SUMMARY

I'm an experienced professional engineer and program manager with degrees in mechanical engineering, aerospace engineering, and business administration. I am passionate about designing and launching new aerospace products to market. I have successfully launched \$20M+ product lines, received 3 U.S. patents, managed power systems for launched satellites and lunar landers, and implemented umbilical systems for Blue Origin's Inaugural New Glenn launch vehicle.

EDUCATION

Bachelor of Science in Aerospace Engineering

Missouri University of Science and Technology • Rolla, MO • 2015

Master of Business Administration

Carnegie Mellon University • Pittsburgh, PA • 2023

Bachelor of Science in Mechanical Engineering

Missouri University of Science and Technology • Rolla, MO • 2015

EXPERIENCE

Technical Project Manager III

Jan 2023 - Present, Denver, CO

Project Engineer III

Blue Origin, New Glenn Umbilicals

- Led design, testing, and manufacturing of New Glenn launch vehicle second stage umbilicals
- Created, implemented, and performed continuous improvements to New Glenn umbilical change control process
- Managed procurement and data tracking for \$10M+ in umbilical hardware
- Managed cradle-to-grave design reviews for New Glenn umbilicals including architecture, PDR, CDR, MRR, and PSR
- Created and maintained new data management tools to improve procurement and design by 3+ months
- Managed architecture process for New Glenn's 9x4 second stage umbilicals

Program Manager

Apr 2021 - Dec 2022, Longmont, CO

Energys ABSL Space Products

- Led teams to design and manufacture two new spacecraft power system product lines
- Concurrently managed financial well-being and customer relations of nine programs
- Developed customer relationships that lead to repeat sales
- Led program KO, CDR, MRR, TRR, and PSR reviews with customers
- Managed customer's scope and critical documentation including SOWs, specifications, etc.
- Prepared financial bid documents and maintained program margin on \$9M+ of programs

Project Manager

Dec 2017 - Apr 2021, Northglenn, CO

Systems Engineer

Roeslein & Associates

- Designed and developed data management software utilizing Python and Java
- Successfully integrated over 10 plants worldwide with production software
- Successfully managed financials, engineering, and logistics of \$20M+ projects while improving schedule
- Won Inductive Automation's Firebrand Award for best implementation of Ignition software

General Manager

May 2015 - May 2017, Columbia, MO

Design Engineer

Ultradyn USA

- Successfully launched \$1 million product line to market
- Designed 9 products for launch and managed a design team for secondary and tertiary launches
- Built testing apparatuses, performed and managed testing, and utilized results for marketing
- Wrote and filed company patents, trademarks, and contracts (see patent list)
- Performed product sourcing while creating manufacturing relationships and keeping all products under budget

ADDITIONAL EXPERIENCE

ETNEHS Intern - L'Oreal	2014, Warren, MI
Maintenance Engineering Intern - Westmoreland Coal	2012 & 2013, Colestrip MT & Kemmerer WY
Electrical & Mechanical Group Intern - General Motors	2011, Warren, MI

SKILLS AND AWARDS

Skills:

Python	R	MySQL	Microsoft Project	C++
LabVIEW	NX	Solidworks	Primavera P6	AutoCAD
DASYLab	LaTeX	Product Development	Manufacturing	Product Sourcing

Awards/Certifications:

Inductive Automation Firebrand Award	Six Sigma Green Belt
Ignition Gold Certification	Professional Engineering License - Colorado
Project Management Professional (PMP)	CMU Space Innovation Challenge - 1st Place, 2021, 2022, 2023

Patents:

- Samuel Campbell 2018. Bore extender for sighting and continuous indexing. U.S. Patent 9,964,376, issued May 8th, 2018.
- Samuel Campbell 2019. System for sight adjustment. U.S. Patent 10,317,171, issued June 10th, 2019.
- Samuel Campbell 2019. Sighting system with foldable front sight with aperture post. US 20190249952, filed Aug 15th 2019.
